

# Does your school already have A SCHOOL LUNCH DIPLOMA?

**THE SCHOOL LUNCH DIPLOMA** certifies that the school provides nutritionally, educationally, and ecologically sustainable school lunches. Finnish schools that support the national school lunch programme may apply for the diploma to show the public their devotion to create enjoyable lunch breaks.

- The goals of the School Lunch Diploma include raising the appreciation of school lunches and the professionals behind them, increasing awareness of lunch-related issues within the school community, and integrating it with teaching.
- A school can apply for the diploma if it has embraced the best practices defined in the diploma criteria. These criteria have been designed to measure the quality of lunch breaks.
- The School Lunch Diploma questionnaire gives new ideas for school lunches and encourages schools to improve those aspects that are not yet at the required level.
